Island County 2045 Comprehensive Plan

Environment

Long Range Planning
January 14, 2026

Purpose of Work Session

Goal – Hear Input on Natural Resources and Climate elements and policies

Reminders:

- Goals and Policies are guiding principals that will frame current and future code updates.
- Focus on the “what” not the “how” during these conversations.
- Keep in mind the need to balance competing priorities.
- Consider what our future communities could look like and how to support growth in ways that reflect our unique islands.

What topic lives where?

Climate

- Framework for climate resiliency.
- Climate hazards & vulnerability analysis.
- Goals & Policies.

Natural Resources

- Background on Critical Areas, Groundwater, and Natural Resources lands.
- Conservation and Tax Benefit Programs.
- Goals & Policies.

Critical Areas Ordinance (To be updated in 2026)

- Land Use and Development standards to protect streams, wetlands, Frequently Flooded Areas, Fish and Wildlife Habitat Conservation Areas, and Steep Slopes.

Approach to Environment Updates

- Balance environmental protections with housing and economic growth.
- Address and enhance community and ecosystem resiliency to a changing climate.
- Continue efforts to conserve, protect, and enhance critical areas, groundwater, farms, and forests.

Required Updates

- New Climate Element, required by the Climate Commitment Act, House Bill 1181
- Address *natural hazards* created or aggravated by climate change.
- Identify, protect, and enhance *natural areas* to foster climate resilience.
- Identify, protect, and enhance *community resilience* to climate impacts.
- Incorporate best available science and no-net-loss into critical areas policies.

Climate – Heat Vulnerability Index

- Darker colors represent communities at higher risk of heat related impacts.
- People of color, lower income households, and people with mobility issues have increased risks.
- Areas in NE Camano and SE Whidbey have increased risk from heat and poor air quality.

Climate – Sea Level Rise

- Darker colors represent more impacts from sea level rise.
- Low lying areas on Camano and South Whidbey are at highest risk for sea level rise.
- **Sea Level Rise combined with heat and drought increases the risk for these communities.**

Climate – Changing Precipitation

- Darker colors represent increased precipitation.
- Areas with higher rates of rainfall may experience increased flooding.
- Areas with lower rates of rainfall may experience increased drought.
- Changing precipitation patterns will affect the entire County due to our reliance on groundwater.

Policy Changes

Summary of Policy Changes for Natural Resources and Climate

Summary of Policy Changes for Natural Resources and Climate	
Conservation	<ul style="list-style-type: none">Policies to encourage the conservation of land, wildlife corridors, and resources (NR 1.3 and sub policies, NR 1.4, NR 1.5, NR Goals 8 and 9 and sub policies).Policies to encourage the protection and restoration of undeveloped coastal ecosystems (CL Goal 2 and sub policies).
Critical Areas	<ul style="list-style-type: none">Policies to continue to protect, preserve and enhance critical areas (NR Goals 2, 3, 4 and 5 and sub policies, CL Goal 6 and sub policies).
Groundwater	<ul style="list-style-type: none">Policies to protect groundwater quality and quantity (NR Goals 6 and 7 and sub policies, CL Goal 3 and sub policies).

Policy Changes

Summary of Policy Changes for Natural Resources and Climate

Resiliency	<ul style="list-style-type: none">Policies to ensure transportation infrastructure can withstand climate related events (CL Goal 5 and sub policies).Policies to support emergency preparedness in response to extreme weather (CL Goal 7 and sub policies).Policies to ensure buildings and infrastructure are sited with respect to climate change (CL Goal 9 and sub policies).Policies to protect our communities most vulnerable populations from climate related impacts (Goal 10 and sub policies).
Agriculture	<ul style="list-style-type: none">Policy to ensure farmland is not converted to other land uses, consistent with state requirements (NR 11.16).Policy to support development that protects agricultural lands (NR 11.18, NR 11.26).Policies to support resiliency of the agricultural economy (CL Goal 8 and sub policies).
Forests	<ul style="list-style-type: none">Policies to promote sustainable forest management (NR 11.7 and 11.8, CL Goal 11 and sub policies).

Decisions Needed

- Confirm that these elements reflect the priorities of Health, Equity, and Climate Resiliency.
- Confirm the balance between the Housing and Land Use elements, and the Natural Resources and Climate elements, meets the needs and demands of our residents.
- Confirm whether commitments in the Climate Element feel achievable in the next 10-20 years.

Island County 2045 – Planning for Our Future
This is the official homepage for the Island County Comprehensive Plan Periodic Update.

Home / Island County 2045 – Planning for Our Future

Background

What will Island County look like in 2045? That is the question Island County's next comprehensive plan will be answering. By 2045, Island County is anticipated to have 102,639 residents, that is more than 15,000 new residents.

A comprehensive plan guides growth over a 20-year period and determines how and where growth will occur. The goals and policies in a comprehensive plan should reflect a communities' values.

Island County's Comprehensive Plan update is due by December 31, 2025. Throughout 2024 and 2025 we will be asking for feedback to inform the update process. Share your thoughts and help shape how our community will

Timeline

- Project Launch: Summer - Fall 2023
- Countywide Planning Policies: Winter 2023-24
- Shaping the Plan: Spring - Fall 2024
