Receive Emergency Alerts & Community Notifications through *myAlerts* Mobile App

Download on the **App Store**

GET IT ON **Google Play**

AlertSense

Island County is using a comprehensive emergency alert and notification system powered by **AlertSense**.

The system allows Island County to send emergency alerts, severe weather warnings, and community notifications that affect you. This free service makes it easy to receive alerts. Download the free AlertSense mobile App using the QR codes below for Android or Apple devices, or search for the app in your respective store.

Need assistance signing up? Email *info@alertsense.com.*

It is easy to add the locations through the app that matter most to you. For example, you can identify your home, child's school, your office, or simply enable the app to monitor your current location in order to receive any emergency alerts issued for the city/area you are visiting.

You can choose the severity of the events to which you'd like to be notified, including automatic weather notifications.

Any information you share will remain private and will only be used to deliver the emergency alerts and community notifications which you subscribe to.
